

Saddle Fit Report (lite)

ID: 1b8355e0-eff3-4e71-90a2-03705d68ba6e

Scheme: high_wither | Saddle: english

Stability: 0 (Potential Concern)

Fit risk: High

Rider: Beginner (13/100)

Warnings: Front-down saddle pitch detected.; Higher saddle rocking detected across the ride.; Noticeable saddle

Tracking: 20.6% over 256 frames

Pitch mean/std: -79.87/123.86 deg

Rock amplitude: 316.79 deg

Drift X: 933.41 px (backward)

Bounce (px): 114.86; cadence: 0.00 Hz; duration: 17.02s

Withers clearance min/mean/std: 89.54/153.26/142.06 px

Topline mean/std: 71.02/46.61 deg; saddle-topline diff: -150.89 deg

Symmetry shoulders/hips (px std): 8.82/9.91; roll proxy: 18.73

Horse topline std: 46.61; confidence: Side-view only; lateral symmetry not observed.

Gear status: WARN

Gear used: helmet -; boots -; pad -; girth -; breastplate -

Detected: helmet unknown (0%); boots unknown (0%); pad unknown (0%); girth unknown (0%); breastplate unknown (0%)

Detection notes: Pose landmarks unavailable; gear auto-detect limited.

Gear notes: Consider breastplate for drift control.

Recommendations: Check withers clearance and front balance. Use fitter guidance if the saddle appears to tip forward.

To improve: Reduce upper-body motion and keep the torso quieter through the stride.; Maintain a steadier lower-body position.

Drills: Ride straight lines and check that shoulders stay level through the stride.; Use light two-point or half-seat position.

Mark Stability: 0.0/10 - Reduce rocking and drift to raise stability.

Mark Alignment: 0.0/10 - Balance saddle to match topline and keep even contact.

Mark Symmetry: 6.3/10 - Level shoulders/hips and equalize stirrup pressure.

Mark Rhythm: 0.0/10 - Keep steady tempo; use metronome or poles if needed.

Mark Clearance: 8.8/10 - Maintain withers clearance; adjust pad/tree if low.

Mark Tracking: 2.1/10 - Film steady side view for higher tracking confidence.

Mark Bounce: 0.0/10 - Engage core and follow motion to reduce bounce.

Mark Drift: 0.0/10 - Check girth, pad grip, and straightness to limit drift.

Top tip: Check withers clearance and front balance. Use fitter guidance if the saddle appears to tip forward.
