

Saddle Fit Report (lite)

ID: 3e1e0af8-c9ea-434b-83d0-c72f1974d172

Scheme: high_wither | Saddle: english

Stability: 0 (Needs Attention)

Fit risk: Medium

Rider: Advanced (99/100)

Warnings: Rear vs front clearance variation suggests bridging tendency.

Tracking: 9.9% over 112 frames

Pitch mean/std: 180.00/0.00 deg

Rock amplitude: 0.00 deg

Drift X: 0.00 px (stable)

Bounce (px): 0.00; cadence: 0.00 Hz; duration: 7.40s

Withers clearance min/mean/std: 117.19/126.82/2.71 px

Topline mean/std: -0.61/0.57 deg; saddle-topline diff: 180.61 deg

Symmetry shoulders/hips (px std): 0.01/0.73; roll proxy: 0.75

Horse topline std: 0.57; confidence: Side-view only; lateral symmetry not observed.

Gear status: PASS

Gear used: helmet -; boots -; pad -; girth -; breastplate -

Detected: helmet unknown (0%); boots unknown (0%); pad unknown (0%); girth unknown (0%); breastplate unknown (0%)

Detection notes: Pose landmarks unavailable; gear auto-detect limited.

Recommendations: Evaluate panel contact; consider shim or refit to reduce bridging.; Cadence not detected (shim or refit to reduce bridging.);

Doing well: Stable rocking across strides.; Minimal forward/back drift observed.; Withers clearance maintained throughout.

Drills: Posting trot with light contact: focus on even shoulder height for 30s intervals.; Two-point over ground poles.

Mark Stability: 0.0/10 - Reduce rocking and drift to raise stability.

Mark Alignment: 0.0/10 - Balance saddle to match topline and keep even contact.

Mark Symmetry: 9.9/10 - Level shoulders/hips and equalize stirrup pressure.

Mark Rhythm: 0.0/10 - Keep steady tempo; use metronome or poles if needed.

Mark Clearance: 9.1/10 - Maintain withers clearance; adjust pad/tree if low.

Mark Tracking: 1.0/10 - Film steady side view for higher tracking confidence.

Mark Bounce: 10.0/10 - Engage core and follow motion to reduce bounce.

Mark Drift: 10.0/10 - Check girth, pad grip, and straightness to limit drift.

Top tip: Evaluate panel contact; consider shim or refit to reduce bridging.
